

Unions are good for our community.

With unions, all workers gain.

- ◆ All workers gain better wages & benefits because unions provide a fair counterbalance to the unchecked power of employers. Unionized & non-unionized workers, make over \$6,000 more in a state like Michigan where unions are strong.
- ◆ All workers gain safety & health protections due to union-supported MIOSHA regulations. These are provided to unionized & non-unionized workers alike.
- ◆ Unions work to improve trade agreements, lifting the standard of living for all workers in our community & the world. America's unions are the best voice for fair trade that helps keep jobs for all workers in Michigan.
- ◆ Michigan workers have more flexibility for work & family needs due to the union-backed Family & Medical Leave Act. This legislation was passed due to the lobbying of unions - but it applies to all workers.

Good union jobs mean stronger communities & protected families.
